	Problem Definition	Solution Definition	Vendor Evaluation	Deciding
<b>Questions</b>	<p>How do we define our problem?            What's best for our population?            How can we do what we do more cost-effectively?            How can we improve efficiency?            How do we improve patient experience?            How can we improve HCAHPS scores?            How to improve affordability and access for patients?            What's the latest trends in wearables?            What happens if we do nothing?            Who else has this problem?            Why is this problem occurring?            Can we solve with what we have?            How does this problem fit into our strategic initiatives and priorities?</p>	<p>Should we build or buy?            What do we look for in a vendor?            What different types of vendors?            What can learn from vendors?            Who are the authorities in this space?            How do leverage existing tools esp EHR?            How have our peers solved this problem,?            What can go wrong?            What are the risks?            What's the impact of not doing vs screwing it up?            What's resource requirement?            How do we avoid failure?            What should we budget?            How do we staff?            How do you get patient engagement/Utilization?</p>	<p>How do you make this successful when most have been disappointing?            How do we know who to trust?            What's different about this?            How is this experience delivered?            Does this integrate with our EHR?            What are the costs?            What are total implementation costs?            How quickly/long can it be implemented?            What's resource requirement?            What else can this solve? Overlap?            Ease of use - patients and providers?            Is this device agnostic?</p>	<p>What is contracting process?            What are your terms and SLAs?            What is payments schedule?            Can I capitalize this?            What guarantees do you provide?            How can we customize?            Will you stand behind it?            How do I know you will be around?</p>
